Ink on paper

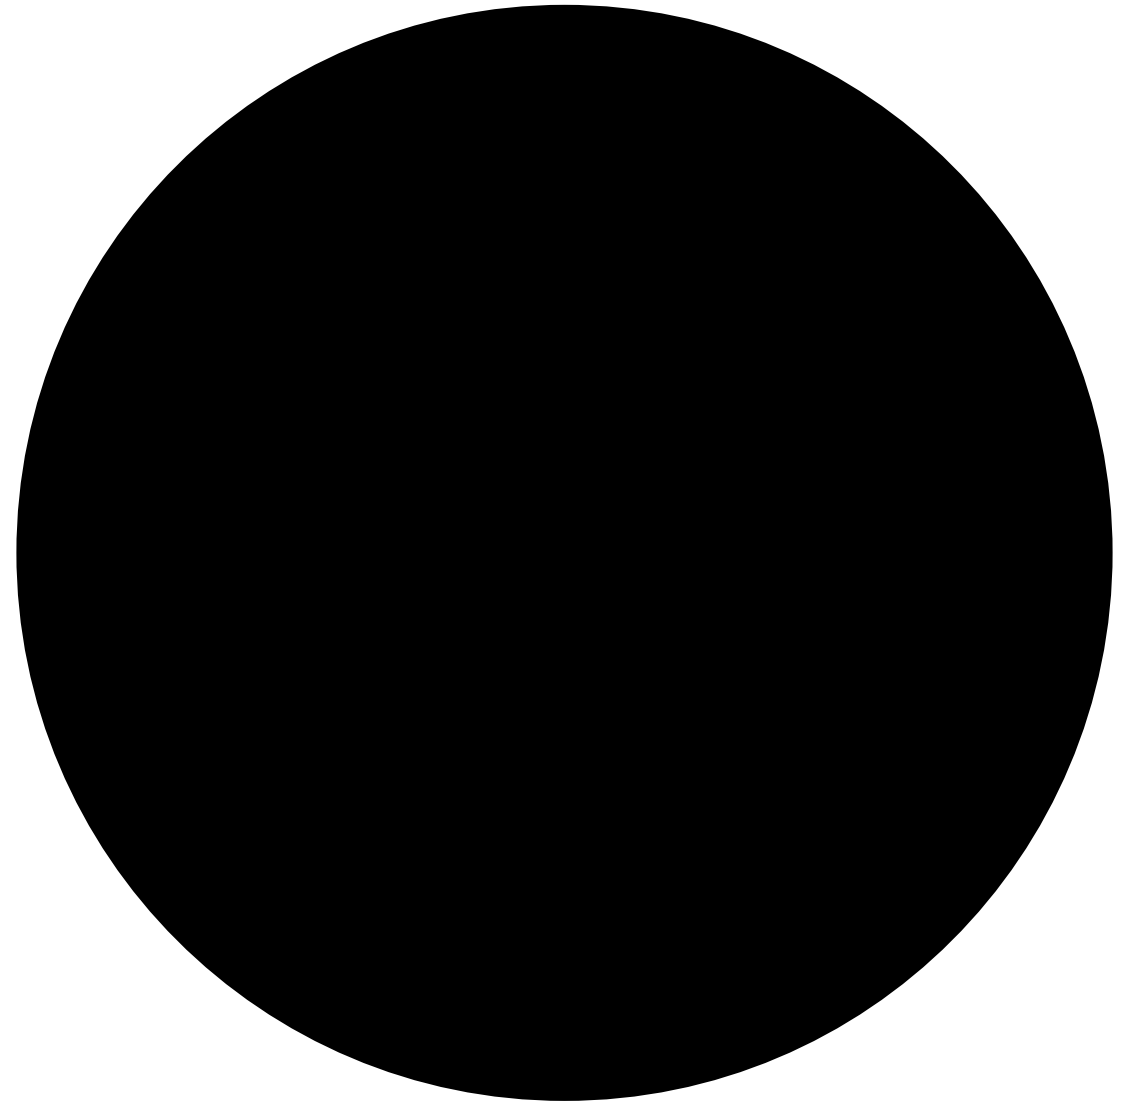

We love ink, and we love paper, but most of all we love putting ink on paper. Our B1 presses produce the best quality litho print. Our reel to sheet feed mechanism enables us to print from paper supplied on reels, which is cut to size during the process. This reduces wastage and costs.

We have a wide range of binding options all available in house, including PUR Binding, Perfect Binding and Saddle Stitching.

To enhance high end products such as prospectuses and brochures, we are able to offer a wide range of finishes including spot UV varnishing, foiling and laminating.

All of the paper which we use is FSC Forestry Scheme Certification accredited and manufactured from mixed or recycled source material. We offer a range of paper sizes, weights and finishes to suit all purposes.

We are family

We are family-owned and run and we consider our employees part of our brood.

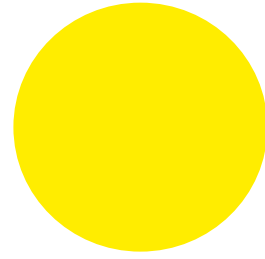

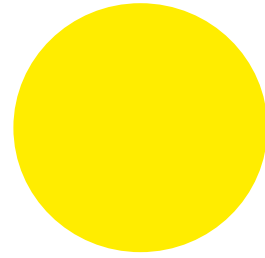

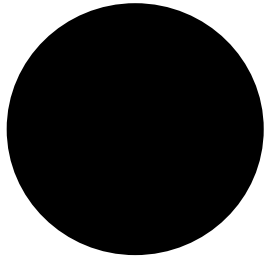

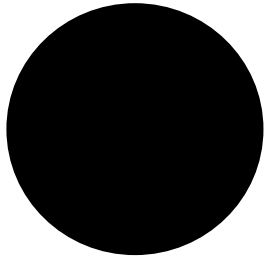

We are close-knit, experienced, hard working and happy. This translates into the best possible print for you.

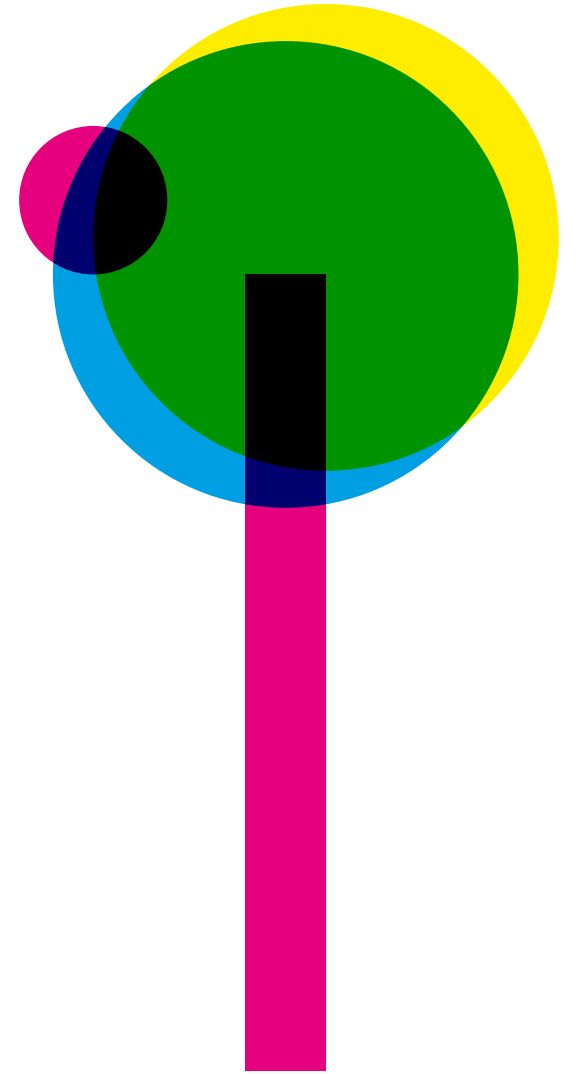

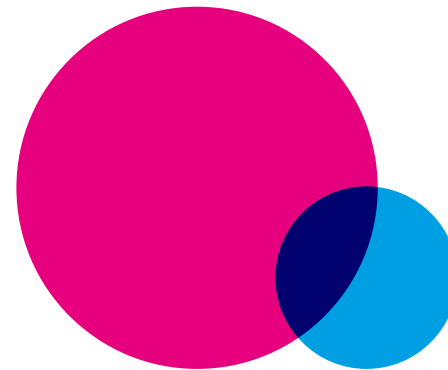

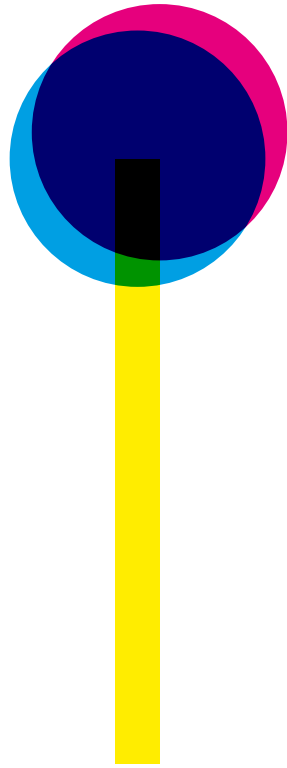

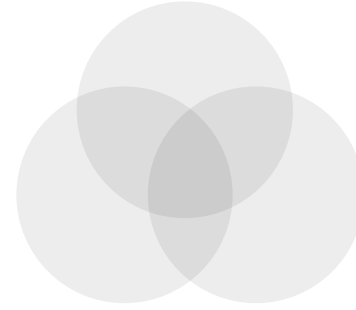

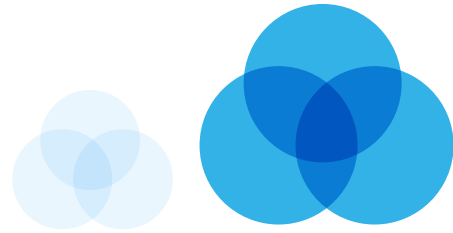

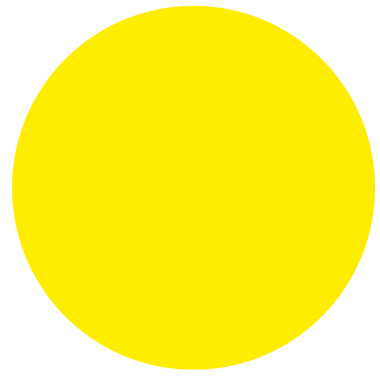

Since forming in 1976 with 40 years of solid experience behind us, we have established a reputation for the highest quality lithographic printing and finishing.

Recently, our family has grown. We can now offer a full-service design and marketing offer through our new sister company 51 Studio.

51 Studio have been helping people, businesses and organisations to communicate, reach new audiences, build trust and enhance reputations for over 10 years, and are one of the most forward thinking design agencies in the South West.

Environnement

We are green

Deltor are one of the greenest printers in the UK.

We actively seek ways of reducing our effect on the environment by monitoring our processes and the materials we use.

We hold ISO14001 certification which is the international standard for environmental management and acknowledges our commitment to effective waste control, the use of sustainable and recycled materials and the reduction of harmful emissions.

Solar Power

Our 14000 sq. ft. solar panelled roof generates a large proportion of our electricity usage and saves over 52,000kg of co2 each year.

Energy Management

The installation of power sensors on all of our machinery and equipment enables us to accurately monitor and manage energy usage.

Reel Fed Paper

Our B1 printing press uses a paper reel-fed system which allows us to tailor with precision the size of paper required for each job, this in turn dramatically reduces the volume of paper wastage.

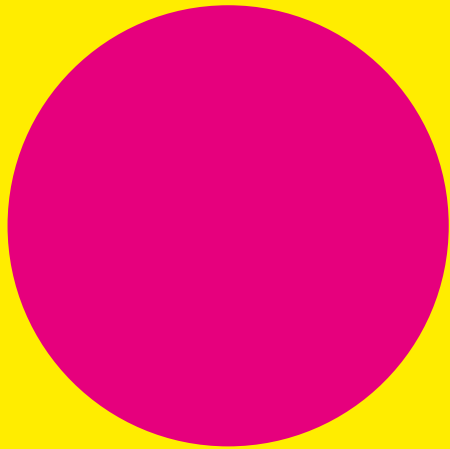

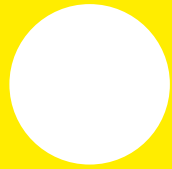

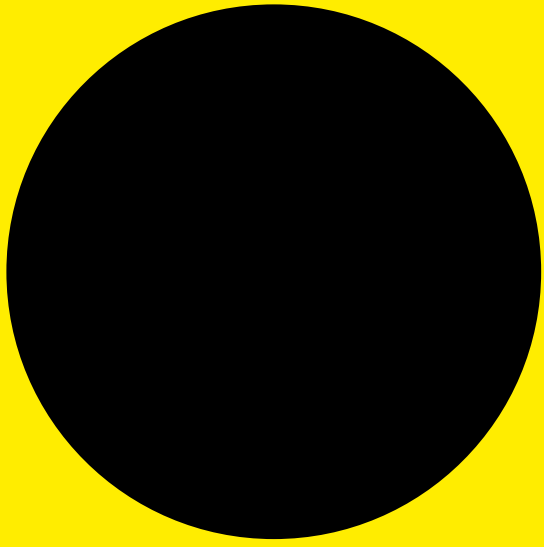

Paper and Inks

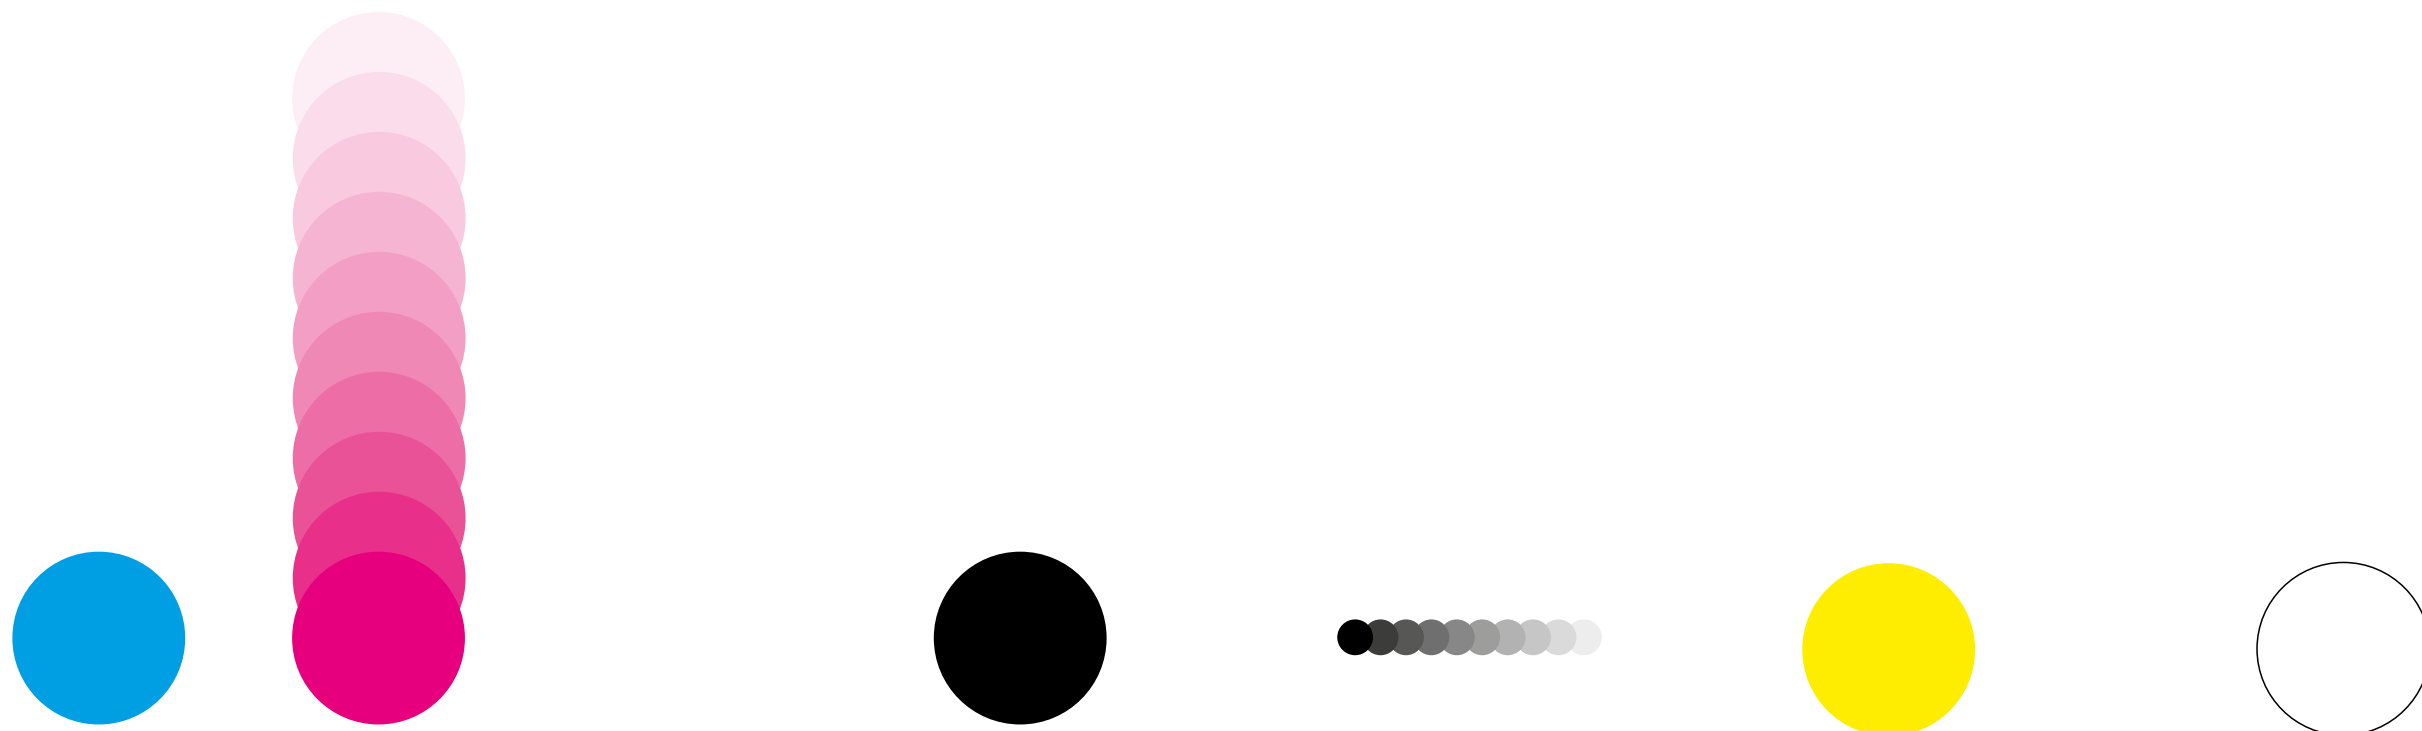

We supply paper and ink that is -

- derived totally from sustainable sources
- recycled from post-consumer waste
- are carbon neutral
- a mixture of both sustainably produced and recycled content
- fully recyclable and biodegradable
- totally chlorine free
- produced from paper mills holding ISO14001 certification
- we are able to provide a chain of custody for our paper supplies, offering an audit trail for the material used and guaranteeing it's source
- where possible we use vegetable based inks without compromising quality.

Deltor work within an ISO9001 certified quality management framework. This has been implemented to provide quality control procedures encompassing all of our processes, from enquiry and estimating through to production, delivery and invoicing.

Our printed products are QA checked throughout the production process to ensure that our customer's specifications and requirements are being met.

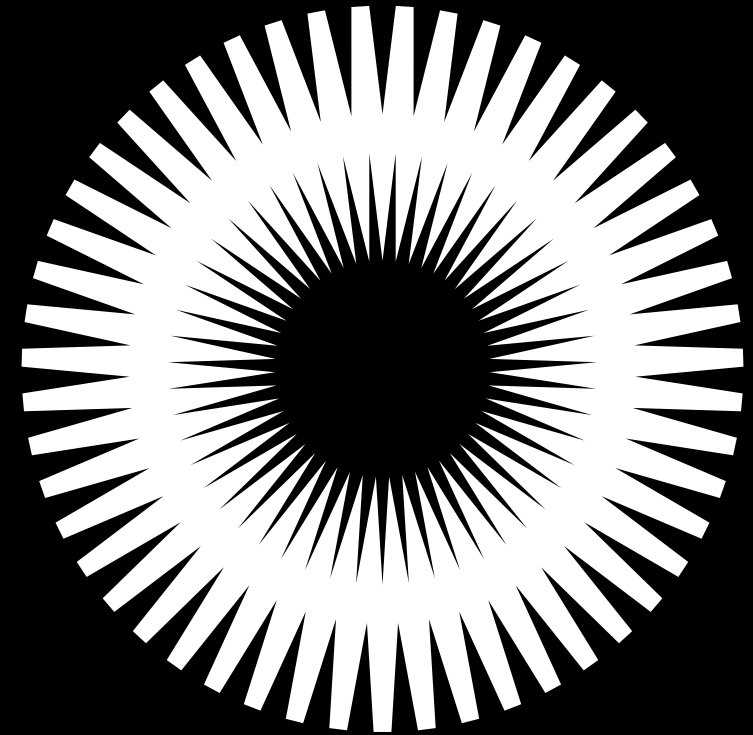

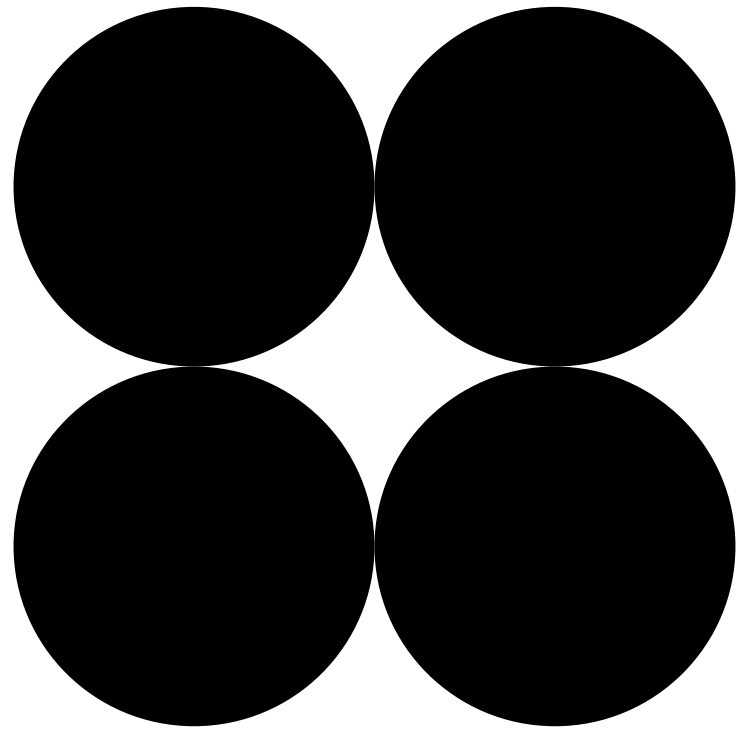

Quality procedures and practices are reviewed and updated as required in response to process changes and improvements. Our Quality Management System is formally reviewed annually, both internally and externally.
